

Home Heat Rate Program

Cherryland Electric Cooperative offers a dual meter program that allows members to receive a reduced rate for permanently installed, electric-based heating units. The reduced rate is limited to the following types of heating units:

- Geothermal heat pumps (\$0.03 reduction for residential rate)
- Air source heat pumps (\$0.03 reduction for residential rate, heating season only, November – May billing)
- Electric baseboard heating (\$0.005 reduction for residential rate)
- Electric boiler systems (\$0.005 reduction for residential rate)

Note: If you have a generator or are considering adding a generator, please contact Cherryland Electric Cooperative first. The generator may not provide energy to the heating system served by the heat meter during a power outage.

Checklist

- 1. Member signs and returns Home Heat Rate agreement** ☐
Efficient or Resistance
- 2. Work order placed for program** ☐
- 3. Member pays \$150 nonrefundable program fee** ☐
Existing home only. New construction excluded.
- 4. Cherryland engineer reviews work order and service eligibility.....** ☐
Cherryland reviews utility drop for service capacity. Additional charges may apply for any required upgrades. Planned or existing 400-amp service may not be compatible with a heat meter. Cherryland will determine if it is possible to add a heat meter to the service.
- 5. Member picks up two-gang meter base from Cherryland's office** ☐
Office located at 5930 US 31 S., Grawn, MI 49637. Business hours are 7:30 a.m. to 4 p.m. Monday thru Friday.
- 6. Member has meter base installed and inspected** ☐
Must be installed by a licensed electrician. Inspection is required for hookup.
