Increase your Rebates

When you make energy efficiency upgrades, you can tap into your capital credits account to get additional rebates. Here's how it works: You decide to make your home more efficient—maybe by upgrading your light bulbs to LEDs or by replacing old inefficient appliances. You're already eligible to receive rebates from us.

But if you want to double or even triple your rebate amount, you can ask us to access your capital credit account early. If you have enough funds available, we'll let you have it at a discounted rate.

It's that simple. That's just another benefit of co-op membership.

Yes! Please check to see if any capital credits are available to increase my rebate.
